Sadia Rakhi

Aspiring Software Developer | Full-Stack Web Developer

sadiarakhibu202211062130@gmail.com · +880 1517-833646 · Dhaka, Bangladesh · sadiarakhi.github.io · github.com/sadiarakhi · linkedin.com/in/sadia-afrose-755332382

PROFILE

I build secure, database-driven web applications with Node.js, Express and MySQL — from the database schema to the user interface and online deployment. Open to junior software developer and web developer roles.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science and Engineering (CSE)

Bangladesh University, Department of Computer Science and Engineering, Dhaka, Bangladesh

Coursework Completed – Final Year Project in Progress · Expected Graduation: 2026

- Final year project: Vendora — Multi-Vendor E-Commerce Marketplace (supervised by Khandakar Tanha Tasnia)
- Academic project: CareLink — Home Nursing Service Web Application (supervised by Akash Kumar Pal)

PROJECTS

Vendora — Multi-Vendor E-Commerce Marketplace

Project type: Final Year Project · Supervisor: Khandakar Tanha Tasnia, Lecturer, Department of CSE, Bangladesh University · Status: In Progress

HTML5, CSS3, JavaScript, Bootstrap 5, Node.js, Express.js, MySQL, TiDB Cloud, JWT, bcrypt, SSLCommerz, Pathao API, Render

A multi-vendor marketplace where many admin-approved sellers sell from one platform. Customers pay by Cash on Delivery or online through SSLCommerz, sellers ship with the Pathao Courier API, and the platform keeps a 10% commission before paying sellers.

- Three roles — customer, seller and admin — each with its own workspace
- Email verification with a 6-digit code, password reset, JWT sessions in HttpOnly cookies
- Cart, wishlist, saved addresses and checkout with transaction-safe stock control

Code: github.com/sadiarakhi/Vendora · Live: vendora-1584.onrender.com

CareLink — Home Nursing Service Web Application

Supervisor: Akash Kumar Pal, Lecturer, Department of CSE, Bangladesh University

HTML5, CSS3, JavaScript, Bootstrap 5, Font Awesome, Node.js, Express.js, MySQL, JWT, bcrypt, Nodemailer, Multer

A home healthcare platform where patients book nursing and care services, the admin assigns nurses and manages the business, and nurses follow their appointments and earnings from their own dashboard.

- Separate admin, nurse and patient dashboards
- Service pages: nursing, home care, palliative care, rehabilitation, counselling, oxygen and medical equipment
- Service booking with nurse selection, pricing plans and service areas

Code: github.com/sadiarakhi/procare-

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), Fetch API, Bootstrap 5, Responsive design

Backend: Node.js, Express.js, REST API design, Middleware, Multer (file uploads), Nodemailer

Database: MySQL / MariaDB, Database management (DBMS), SQL & schema design, ER modelling, Transactions & row locking, phpMyAdmin, TiDB Cloud

Security: JWT authentication, bcrypt password hashing, Role-based access control, Rate limiting, Helmet & CORS, Input validation

Integrations: SSLCommerz payment gateway, Pathao Courier API, Transactional email (Brevo API), Gmail SMTP

Tools & Deployment: Git & GitHub, VS Code, XAMPP, Web application deployment, Render (cloud hosting), Environment configuration (.env)

Software Engineering: Use case, ER & DFD diagrams, Sequence & state diagrams, Automated API testing, Iterative development

Also Familiar With: PHP, React.js, Java, Web design, Microsoft Excel

Soft Skills: Problem solving, Communication, Research, Leadership
